We open on a green LED light in the center of screen.

As the camera pulls out, the light is revealed to be part of a charging case.

Within the case, we see the Razer Hammerhead True Wireless earbuds pop out.

Text appears: Razer Hammerhead True Wireless

We cut to an extreme closeup of one of the earbuds, as its bright Razer Chroma™ RGB logo flashes and changes color.

The camera pulls out to reveal a backdrop of colorful audio waves.

Text appears: Powered by Razer Chroma™ RGB

The single earbud multiplies to 5, each one glowing with a different combination of colors, highlighting just how customizable its RGB lighting is.

We cut to a pair of earbuds circling each other against a backdrop of green audio waves, as a transparent spherical shield forms around them.

Text appears: Active noise cancellation technology

We cut to the high-tech internals of the earbud, as 4 beams of green energy streak towards a microchip at the center of the shot.

Text appears: 60ms low latency gaming mode

We cut back to the set of 5 earbuds glowing with Razer Chroma™ RGB.

We cut to colorful audio waves dancing across the walls and floor of a room, as a pair of earbuds float out from a hole at the center of the space, accompanied by the charging case.

The earbuds float into the charging case.
