Text appears: Razer Strider. Swipe. Stop. Win.

We open on a shot of the Razer Strider hybrid mouse mat floating in a grey void.

The camera zooms into the mat, revealing a revolving loop.

Text appears: Hybrid mouse mat.

Dialogue: Two distinct forms, divided in philosophy.

The corner of a hard mat and corner of a soft mat float closer to make contact.

The camera zooms in on a microscopic level as they edge closer together.

Dialogue: Hard or soft.

Text appears: Hard

A surface of hard metallic geometric shapes ebb and flow.

Text appears: Soft

A surface of plush, circular globules push against each other.

A wave appears across the mat, as a green grid appears across its surface.

Dialogue: Speed or control.

Text appears: Fast Glide

A mouse zooms across a flat grid surface towards the horizon, flanked by hard, craggy rock formations.

Text appears: High Precision

The mouse floats across a flat dotted surface towards the horizon, flanked by rolling hills and circular floating rocks.

Dialogue: Yet one dares defy.

The mouse suddenly floats up and rotates upside down, switching gravity to land on the previous surface.

Dialogue: A blend of two styles, for the best of both worlds.

Text: Fast glide + high precision

As the mouse races towards the horizon, the gap between both surfaces—one on the top and one on the bottom—narrows as if the sky itself is closing.

Dialogue: A fusion that goes beyond convention.

The camera zooms out to a revolving loop.

Dialogue: A hybrid in a class of its own.

Text: Hybrid

A quick close-up of the mat’s underside reveals a hexagonal pattern, highlighted by green energy.

A close-up of the mat unrolling—the motion highlighted by green energy.

A close-up of the mat’s stitched edges, highlighted by green energy.

A close-up of the mat’s water-resistant surface, highlighted by rippling green energy.

The mat shimmers with a green grid pattern.

Dialogue: The Strider.

The mat’s hexagonal pattern zooms out.

Text appears: Anti-slip base

A circular green energy appears, emphasizing the mat's rollable properties.

Text appears: Rollable and portable.

A series of green horizontal lines gravitate towards the center, building into a thicker and thicker line.

The shot zooms out to reveal the line as part of the mat.

Text appears: Anti-fraying stitched edges.

The mat’s surface ripples with green energy.

Text appears: Water-resistant.

Two different sizes of the Razer Strider float in a grey void—one long and rectangular, one short and squarish.

Text appears: Razer Strider.

Razer logo appears.
